Molecular Parasitology Lab Manual

3rd Edition, October 1988

Section 1 : Parasites and Antigens

Somatic Antigens	Method	1	Page	1
Parasite Culture and ES Antigens	Method	2		3
Metabolic Labelling	Method	3		4
Surface Antigens	Method	4		5

Section 2 : Proteins

General Methods	Protein Detection	Method	5	7
	Protein Labelling	Method	6	8
Gel Techniques	SDS-PAGE	Method	7	9
	2D PAGE	Method	8	14
	Gel Staining	Method	9	17
	Autoradiography	Method	10	19
Peptide Maps	Method	11		21
Conjugation to proteins	Method	12		22

Section 3 : Antibodies

Production	Polyclonals	Method	13	24
	Monoclonals	Method	14	25
Analysis	Western Blots	Method	15	30
	Immunoprecipitation	Method	16	33

Section 4: Immunoassays

ELISA	Method	17	34
IRMA	Method	18	37
Two-site ELISA	Method	19	38
IFAT	Method	20	39
Immuno-EM	Method	21	40

Section 5: Purification of Antigens and Antibodies

Gel Filtration	Method	22	42
Antibody Purification	Method	23	44
Affinity Purification	Method	24	46
FPLC	Method	25	48

Section 6 : Carbohydrates

Lectins	Method	26	49
Gel Systems	Method	27	50
Glycosidases	Method	28	52
Chemical Cleavage	Method	29	53

Section 7 : Enzymes

Proteases	Specificities	Method	30	55
	Inhibitors	Method	31	56
	Detection in solution	Method	32	57
Protease Gels	Method	33	58	
Other Enzymes	Detection in solution	Method	34	60

Section 8: Parasite Maintenance

<i>Brugia malayi</i>	Method	35	63
<i>Nippostrongylus brasiliensis</i>	Method	36	67
<i>Toxocara canis</i>	Method	37	68

Section 10: Appendices

Buffers	Appendix	1	69
Suppliers	Appendix	2	70
Amino Acids	Appendix	3	71
